

Coldform2 Single Lamination Pads in Maintenance

With a fabric weight of 286 gsm there are 100 pads in the bale, which is half the number when compared to the lighter weight 165 gsm 200 pad count version, and as a result offers a much heavier per square metre product.

This is the sustainable option to Maintenance polypropylene absorbents and is made from 80% renewable/recycled materials. The pads out perform meltblown single lamination, sonic bonded and Airmatrix when absorbing aqueous based liquids, and at a lower price point too.

The single sided laminate combines the best features found in a laminated pad (no-lint & durability), while reducing the slip problem associated with double sided laminated sorbents. These features make this pad a fantastic sustainable Maintenance product.

Specifications

Weight: 286

Absorbency: 97 Litres | 25.6 US Gallons of oil** 74 Litres | 19.5 US Gallons of water**

Base Fibre: Cellulose

Size: 40 cm x 46 cm (16" x 18")

Recycled Content: 80

Units/Case: 100

Weight/Case: 5.3 kg (11.7 lbs)

LTL/Pallet: 30

FTL/Pallet: 36
