

IBX 12" Wall Pop-Up Berms

Product Description:

Our Pop-Up Spill Containment Berms are the essence of convenience because they have compressible sidewalls and are engineered as a single unit. These berms are great for rugged environments because the brackets are fully encased in the heavy-duty berm material, extending their life cycle, reducing loss due to misplacement and discouraging theft. The sidewalls are quickly folded up and down, creating a containment system for leaks and spills of oil, fuel, chemicals and other environmentally harmful chemicals. Pop-up spill containment berms are ideal for frac tanks, parking or loading/unloading tanker trucks, placing under generators and industrial equipment, storing oil drums and chemical containers, washing down vehicles and anywhere else a catch-all system is needed. - Constructed with our robust **X-Guard™ fabric**, these Pop-up Berms are suitable for most operating environments!

Applications

- Frac Tanks • Mining operations • Fuel Tanker Trucks • Industrial Rental Equipment • Pumps and Generators • Drum Storage
- Roll-off Containers • Fleet Rental Companies

Features & Benefits:

- Made from UV, chemical and acid resistant X-Guard™ fabric
- Brackets are integrated into berm
- Brackets are fully encased in material for longevity
- Several complimentary accessories are available
- Incredible time saver
- Exceptional durability, especially after multiple uses
- Easy to set up, maintain and dismantle
- Single piece construction
